## Profile Summary

Final-year B.Tech Information Science student with hands-on experience in Python, SQL/PostgreSQL, and REST API development (FastAPI, Flask, Django). Skilled in relational database design, query optimization, and building backend applications with Git-based version control. Seeking a Software Engineer role to apply strong problem-solving and debugging skills to real-world software development.

## Projects

**E-Commerce Sales Analytics Database | PostgreSQL, FastAPI, PL/pgSQL** GitHub

- Engineered a PostgreSQL analytics engine using advanced window functions, CTEs, and self-joins to surface customer segments, top sellers, and product affinity insights
- Automated inventory management and atomic order processing using PL/pgSQL triggers and stored procedures, enforcing data integrity directly at the database layer
- Boosted query performance through EXPLAIN ANALYZE-driven indexing, served via a FastAPI REST layer

**Book Insight Platform | Python, Django, Next.js, MySQL, LM Studio** GitHub

- Built a full-stack web application that scrapes book data and serves it via REST APIs
- Integrated a local LLM (Llama 3.2 via LM Studio) to generate AI summaries and genre classification
- Developed a QA interface where users can ask questions about books and get AI-generated answers
- Built a React frontend with 3 pages: dashboard, book detail, and QA interface

## Internship

**Tata Group Data Analytics Job Simulation (Forage)** Jan. 2026
*Virtual Internship*

- Completed an AI-powered data analytics and strategy simulation for Tata iQ's Financial Services.
- Performed exploratory data analysis using GenAI tools to assess data quality and identify delinquency risk indicators.
- Designed a no-code predictive modeling framework to evaluate customer delinquency risk.
- Developed an agentic AI-driven collections strategy emphasizing ethics, compliance, and scalability.

## Education

**Nagarjuna College Of Engineering And Technology** 2022 – 2026
*Bachelor of Engineering / Technology* *CGPA: 7.2*

## Skills

**Programming:** Python,SQL

**Databases:** PostgreSQL

**Tools and Technologies:** Fast API,REST API design ,Git and GitHub, LLM integration(claude API,LM Studio, Llama)

**Data Analytics:** Pandas,Numpy,Data visualization

**Soft Skills:** Problem Solving,Communication,Team Collaboration
